

Grain to Glass

Snakes and ladders for brewers

Good brewing habits are ladders. Brewing faults are snakes. Start at the grain and race to the glass.

How to play

Rules and lessons

1. Everyone starts off the board, before square 1. Youngest player goes first.
2. Roll the die and move your cap that many squares, following the numbers.
3. Land at the foot of a ladder and climb to its top. Land on a snake's head and slide down to its tail.
4. Read the lesson out loud each time you climb or slide. That is the brewing class.
5. You need the exact roll to land on 100. The first player into the glass wins.

Ladders: good habits

- **4 to 25: Sanitised everything.** Clean, then sanitise every surface that touches cold wort.
- **9 to 31: Calibrated the thermometer.** A thermometer two degrees out changes your whole mash.
- **21 to 42: Pitched healthy yeast.** Enough fresh yeast gives a fast and clean start.
- **28 to 56: Controlled fermentation temperature.** Steady temperature keeps esters and fusel alcohols in check.
- **36 to 57: Took gravity readings.** The hydrometer, not the calendar, tells you fermentation is done.
- **51 to 72: Kept a brew log.** Write it down so you can repeat a good batch or fix a bad one.
- **62 to 83: Purged kegs with CO2.** Oxygen is the enemy of finished beer.
- **71 to 92: Ran a sensory panel.** Trained tasters catch faults before customers do.

Snakes: brewing faults

- **17 to 7: Skipped sanitising.** Bacteria and wild yeast love a lazy brewer.
- **32 to 10: Stuck mash.** Too fine a crush or too much wheat stops the run-off.
- **48 to 26: Mashed too hot.** Beta-amylase dies early, leaving a sweet and heavy beer.
- **54 to 34: Rushed the diacetyl rest.** Packaging too early leaves a buttery off-flavour.
- **87 to 24: Infected batch.** One dirty valve can sour a whole tank.
- **93 to 73: Oxidised in packaging.** Oxygen pickup turns fresh hops to cardboard within weeks.
- **95 to 75: Clear glass bottles.** Sunlight plus hops makes skunky beer in minutes.
- **98 to 79: Over-primed bottles.** Too much priming sugar means gushers or even bottle bombs.

Cut out

Pieces and die

Print on thick paper or card. Cut out the caps and glue each onto a coin or a real bottle cap so it sits flat. Fold the die along the lines and glue the grey tabs inside. Or just use any die you have.

Pale

Amber

Hop

Stout

Blue

Teal
